“Congratulations and thank you for your development of books for sighted and blind people to read together. You address the very problem I have found when I read with my daughter, who is 5 and learning Braille.”

“I am sure that all of the books you are able to make available in the new format you have developed will benefit many parents and children alike.”

– *Gary Olson*

“I am pleased that you have devised a good way for shared reading. I am a braille reader, and have been both a teacher and a parent, so this dual reading publication would have been very useful for me. As it was, we devised somewhat unsatisfactory methods of making shared books for me and my sons, who are all sighted.”

– *Rebecca Maxwell*
